The same profile shall be applicable for each Contract Year during the Term of the PPA, and shall be matched by RE supply scheduled by the RPD. The RPD shall be required to maintain a Demand Fulfilment Ratio (DFR) of at least 90% for each time-block, to be reconciled on a monthly basis. "Demand Fulfilment Ratio" for a particular time-block shall be calculated as follows: $DFR = [\text{Power Injection Scheduled by the RPD (MW) in a particular time block} / \text{Demand (MW) specified by the Buying Entity (MW) for the corresponding time block}]$, subject to the max value of DFR being 1. The RPD's performance against this metric will be measured by adding up the shortfalls in DFR against each time-block during the month in a Contract Year in which power has been scheduled.

2.11.4 The RPD shall schedule power on day-ahead basis, to match the demand profile in every 15 minutes' time-block. Intra-day variation from day ahead schedule would be

allowed to the extent that it does not exceed the demand specified in the corresponding time-block. Intra-day variation (if any), shall be intimated at least one time-block prior to the RTM gate closure. The Buying Entity shall compulsorily offtake all the power, subject to the maximum power scheduled in any time-block being equal to the demand specified in the corresponding time block.

2.11.5 Notwithstanding Article 2.11.3, the SECI/RPD is free to sell power in excess of time block-wise demand of Buying Utility to any third party or power exchange without requiring any NOC from Buying Entity. Any energy produced and flowing into the grid before SCSD shall not be to the account of or at the cost of SECI/ Buying Entity. SECI may however agree to buy such power at a tariff as agreed to between SECI and the Buying Entity (including SECI's trading margin), provided the Buying Utility consents for purchase of such power.

2.11.6 The penalty as per Article 4.4.3 of the PPA shall be applied to the amount of shortfall in generation during any Contract Year. However, this compensation shall not be applicable in events of Force Majeure identified under this Agreement affecting supply of power by SECI/RPD.

- iii) Payment under Article 2.13 and other charges, if any.

And such Supplementary Bill shall be paid by the other Party.

2.12.2 Buying Entity shall remit all amounts due under a Supplementary Bill raised by the SECI to the SECI's Designated Account by the Due Date.

2.12.3 In the event of delay in payment of a Supplementary Bill by either Party beyond its Due Date, a Late Payment Surcharge shall be payable at the same terms applicable to the Monthly Bill in Article 2.3.

2.13 Offtake constraints due to Grid Unavailability & Reduced Offtake

2.13.1 Generation Compensation in offtake constraints due to Grid Unavailability: During the operation of the Project, there can be some periods where the Project can generate power but due to temporary transmission unavailability, the power is not evacuated, for reasons not attributable to the RPD. In such cases, subject to the submission of documentary evidences from the competent authority, the generation compensation shall be restricted and payable by the Buying Utility as under, and there shall be no claim, directly or indirectly against SECI:

Duration of Grid unavailability	Provision for Generation Compensation
Grid unavailability beyond 175 hours in a Contract Year, as defined in SECI-RPD PPA	<p><i>Generation Compensation =</i> <i>(Tariff x RE power (MW) offered but not scheduled by the Buying Entity)</i> <i>X 1000 X No. of hours of grid unavailability</i></p> <p>However, in case of third-party sale or sale in power exchange, as price taker, the 95% of the amount realized, after deducting expenses, shall be adjusted against the Generation compensation payable, on monthly basis.</p>

Tariff shall be the Applicable Tariff as per Article 9 of the PPA. The above compensation will be paid to the RPD on an annual basis.

2.13.2 Payment in case of reduced offtake: The RPD and the Buying Entity shall follow the forecasting and scheduling process as per the regulations in this regard by the Appropriate Commission. In case the Project is available to supply power but the offtake of power is not done by the Buying Entity, including non-dispatch of power due to non-compliance with “Electricity (Late Payment Surcharge and Related Matters) Rules, 2022 notified by the Ministry of Power vide Gazette notification dated 3rd June 2022” and any clarifications or amendment thereto, considering the principle of

‘must run’ status for RE Power, the RPD shall be eligible for payment from the Buying Entity, corresponding to the reduced offtake, in terms of following manner.

Reduced offtake	Provision for Generation Compensation
Grid unavailability beyond 175 hours in a Contract Year, as defined in SECI-RPD PPA	<p><i>Generation Compensation = (Tariff x RE power (MW) offered but not scheduled by the Buying Entity) X 1000 X No. of hours of Reduced Offtake</i></p> <p>However, in case of third-party sale or sale in power exchange, as price taker, the 95% of the amount realized, after deducting expenses, shall be adjusted against the Generation compensation payable, on monthly basis.</p>

Tariff shall be the Applicable Tariff as per Article 9 of the PPA. The above compensation will be paid to the RPD on an annual basis.

For claiming either of the above two compensations, the RPD must sell their power in the power exchange as a price taker. Thus, the compensation would be limited to the difference of the actual generation up to declared capacity subject to a maximum of up to the Contracted Capacity and the quantum of power scheduled by the Buying Entity.

The RPD shall be eligible for payment from the Buying Entity, corresponding to the reduced offtake of power as per above mentioned methodology. The Payment is to be done as part of the energy bill for the successive month after receipt of Energy Accounts (REA)/SEA/JMR. No Trading Margin shall be applicable on this Payment. It is hereby clarified that for the purpose of this Article, “generation” shall mean scheduled energy based on Energy Accounts. Notwithstanding anything mentioned above, the provisions of Article 4.10 of the PPA shall be applicable subject to the acceptance of the same by the respective Buying Utility. The RPD shall not be eligible for any compensation in case the Backdown is on account of events like consideration of grid security or safety of any equipment or personnel or other such conditions or Force Majeure.
