2.13.2 Generation Compensation in offtake constraints due to Grid Unavailability: During the operation of the plant, there can be some periods where the Project can generate power but due to temporary transmission unavailability, the power is not evacuated, for reasons not attributable to the Hybrid Power Developer. In such cases, subject to the submission of documentary evidences from the competent authority, the generation compensation from Buying Entity shall be restricted to the following and there shall be no other claim, directly or indirectly against SECI:

Duration of Grid unavailability	Provision for Generation Compensation
Grid unavailability in a Contract Year as beyond 50 hours in a Contract Year, as defined in SECI-HPD PPA	<p><i>Generation Compensation= ((Tariff X RE Power (MW) offered but not scheduled by the Buying Entity)) X 1000 X No. of hours of grid unavailability.</i></p> <p>However, in the case of third-party sale or sale in the power exchange, as price taker, the 95% of the amount realized, after deducting expenses, shall be adjusted against the Generation compensation payable, on monthly basis.</p>

Compensation (if any) calculated as per above provision, will be paid by Buying Entity to the HPD on an annual basis.

2.13.3 Payment in case of reduced off take: In case the plant is available to supply power but the off take of power is not done by the Buying Entity, including non-dispatch

of power due to non-compliance with “Electricity (Late Payment Surcharge and Related Matters) Rules, 2022 notified by the Ministry of Power vide Gazette notification dated 3rd June 2022” and any clarifications or amendment thereto, considering the principle of “must run” status for RE Power, the HPD shall be eligible for payment from the Buying Entity, corresponding to the reduced off take, in terms of following manner:

Reduced Off-take	Provision for Generation Compensation
Reduced off-take beyond 50 hours in a Contract Year, as defined in SECI-HPD PPA	<p><i>Generation Compensation= (Tariff X RE Power (MW) offered but not scheduled by the Buying Entity) X 1000 X No. of hours of Reduced Off take.</i></p> <p>However, in the case of third-party sale or sale in the power exchange, as price taker, the 95% of the amount realized, after deducting expenses, shall be adjusted against the Generation compensation payable, on monthly basis.</p>

2.13.3 For claiming compensation the HPD must sell their power in the power exchange as a price taker. Thus, the compensation would be limited to the difference of the actual generation up to declared capacity subject to a maximum of up to the Contracted Capacity and the quantum of power scheduled by the Buying Entity.

2.13.4 The HPD shall not be eligible for any compensation in case the Backdown is on account of events like consideration of grid security or safety of any equipment or personnel or other such conditions. The Generation Compensation shall be paid as part of the energy bill for the successive month after receipt of Energy Accounts (REA)/SEA/JMR. No Trading Margin shall be applicable on the Generation Compensation as provided in Article 2.13.

It is hereby clarified that for the purpose of Article 2.13 “generation” shall mean scheduled/actual energy as applicable based on Energy Accounts.
